ETCETERA® EPM FOR HOSPITALS - PATIENT CARE

Below is a sample list of applications in hospital departments that could be replaced using ETCETERA® Enterprise Process Management (EPM). EPM is comprised of application design, online data capture, integration with host applications, automated routing and collaboration with signature capabilities, report generation, and legal electronic storage and access.

Application User Interface (AUI) design is accomplished in as little as one (1) hour per page and most AUI development is performed by non-technical employees. What is accomplished in a single department can be rapidly expanded and deployed throughout the entire organization, creating hundreds of applications and eliminating vast amounts of paper, file cabinets, and low-value work processes.

ScerIS is a resource to hospitals at the department level and across the enterprise. EPM deployments help reduce costs while facilitating increased employee productivity and satisfaction. EPM is fully integrated with ETCETERA® Enterprise Content Management (ECM) to apply across your organization in extraordinary ways. Learn how ETCETERA® software products can help your hospital.

Patient Care - Hospitals - (Examples of AUIs)

Admissions Forms (online)
Admission / Transfer Physicians Orders
Admission / Visit Summary
Admission Assessment
Admission Database
Admission List
Admission Medication Reconciliation
Admission Note / Consultation
Admission Physicians Order
Admission Profile-Interdisciplinary
Admission-Annual Physical Exam Form
